

## MPIC Research Projects Approved for 2010 & 2011

Title	Researcher	MPIC Funding Request	MPIC Funding Approved
Enhancing potato quality through genetic improvement & variety development	Douches	\$ 30,000	\$20,000
2010 MSU Nematology Laboratory Research	Bird	\$ 15,000	\$ 7,500
Upper Peninsula potato variety trial	Min/Long	\$ 1,400	\$ 1,400
Screening of novel russet varieties for adaptation to a MI production environment	Long/Douches	\$ 14,000	\$12,000
Diversity of streptomyces species & management of potato common scab using biological & non-chemical methods	Hao	\$ 25,072	\$20,000
Monitoring & managing CPB resistance	Szendrei	\$ 25,000	\$17,500
Management of disease suppression & soil quality in potatoes (continuation)	Grandy	\$ 11,500	\$10,000
Integrated management of soil, seed & foliar borne diseases of potato crops in MI in relation to environment & host specificity	Kirk	\$ 30,000	\$20,000
Delayed release Nitrogen effect on potato yield & vine kill	Everman	\$ 9,500	\$ 5,000
Late season weed control in low vine vigor varieties	Everman	\$ 10,500	\$ 5,000
Physiology of resistance to Imidacloprid in Michigan over wintered resistant beetles	Mota-Sanchez	\$ 12,000	- 0 -
Total Requested /Approved		\$183,972	\$118,400
